

DEEKSHA GAHLOT

SENIOR PRODUCT DESIGNER

gahlot.deeksha345@gmail.com | +91 7678344852 | [LinkedIn](#) | [Portfolio](#)

Senior Product Designer with almost 5 years of experience leading end-to-end UX/UI design, from early research to GTM launch. I turn complex workflows into simple, intuitive products with measurable impact across app and web. Currently shaping Shiprocket's AI-first seller platform.

SKILLS & TOOLS

Skills: AI Product Design, Interaction & Visual Design (UI), UX Research & Usability Testing, Journey Mapping & User Flows, Information Architecture, Design Systems & UI Consistency, Accessibility, Data-Driven UX (GA4), Rapid Prototyping, 0-to-1 Product Design, Cross-Functional Stakeholder Management

Tools: Figma (incl. AI Agents), Adobe XD, Claude, Lovable, Google Analytics, Microsoft Clarity, Miro, Balsamiq

EXPERIENCE

Shiprocket : Senior UX/Product Designer

Apr 2024 – Present

Own end-to-end UX/UI, including research, design, GTM planning, and GA4 analytics, across Shiprocket's web and app seller platform. All projects are independently led and driven by the design team.

- **Shiprocket Agentic:** leading end-to-end UX/UI for an AI-first conversational seller platform, from early research through a live SHIVIR demo for early feedback. Now piloting with selected sellers, with strong early positive response. Designed about 70% of the experience in Claude, with UI elements refined in Figma.
- **Twenty2 (AI voice platform):** owned end-to-end design for this early-stage product across web and app, with research as part of the process, in partnership with product managers. Currently live with early users.
- **Unified Add Order Experience:** redesigned the Add Order flow into a single, customisable experience, cutting order-creation time ~80% (9→1 min), lifting first-month adoption to 75% and CSAT to 4.2/5.
- **Rider, Domestic & Quick Apps:** rebuilt the Rider App from scratch after field research, revamped core Domestic App journeys (onboarding, ordering, shipments), and contribute to select Quick Commerce (Quick App) journeys.
- **Platform UX & GTM:** shipped system-level wins including Smart Search (40% faster, 80%+ adoption), Bulk Upload, and Keyboard Shortcuts (6.8M+ actions across 34K users), and drove GTM launches that sustained 90%+ adoption.

Pidge : Product Designer

Mar 2023 – Apr 2024

- **End-to-end web & mobile app design:** Cash Management, Fleet Management, Rider Lending, and Login & Onboarding, across both web and mobile app.
- **Design Systems & Handoffs:** introduced a modular design system and help-centre prototype, cutting handoff time by 30% and reducing support dependency.

Pickrr : UI/UX Designer

Jan 2022 – Mar 2023

- **Fastr Checkout & Seller Dashboard:** redesigned key checkout flows, reducing drop-offs by 25%. This is now a live, scaled checkout product across Shiprocket's seller base. Also rebuilt the component and visual system for a scalable multi-product experience.

ACHIEVEMENTS

- Presented Shiprocket Agentic live at SHIVIR, Shiprocket's flagship industry event, to an audience of thousands of sellers, gathering early product feedback directly from users.
- Reliable Ranger Award (ownership & collaboration); hackathon project (Shiprocket Trends) shipped as a live product; ran UX/UI masterclasses for product & design teams.

EDUCATION & CERTIFICATIONS

- Bachelor's Degree: University of Delhi (2017–2020)
- Senior Secondary: CBSE (2017), CGPA 9.5.
- UI/UX Design: Internshala (2021)
- UX Fundamentals: Future Learn (2021).
